First name: James
Last name: Armbrust
Organization:
Title:
Comments: Our family has utilized most all of the secondary roads in units 27/1 for more than the last 50+ years to enjoy fishing, hunting, and other outdoor activities in the national forest. USFS intentions to close a significant amount of these roads widely used by the public will be very discriminatory to those up in age (like me), as well as our children that do not have normal foot mobility. Please consider all age groups as you go forward with road closing considerations in areas with strong recreational interest t the public. You have already closed numerous roads with unintended consequences.
