Comments: The proposed land swap with the Crazy Mountain Ranch is a bad deal for the public interest. I have personally hunted in that area and numerous other places in the Crazies, so I have a personal stake in the proposed lands that will be transferred as part of this deal. I can tell you that this is not a benefit for hunters and anglers in terms of the proposed net outcome. The land that would be transferred to National Forest holdings is hardly prime habitat for recreational use. The land that's available for public use as it stands are areas we want to keep access to. We would be giving up some valuable parcels of land in this deal. I don't see how the sections you're suggesting we receive in return are ones we want for use as a public utility. Please do not make this deal with Crazy Mountain Ranch. Keep the sections in question in National Forest hands. Please make a concerted effort to listen to the numerous people who oppose this land swap deal.
