Comments: Please reconsider this land swap, while the rock creek ranch and wild eagle ranch land exchanges make sense, their value comes up far short when considering what the public is giving up in the crazy mountain ranch exchange. The US Forest Service wants us to believe we are getting good value with the crazy mountain ranch exchange but this is far from the truth. I grew up in Livingston MT and spent a great deal of time in the crazies and still visit the area in question frequently with my sons. I doubt the people making this decision know or use the Rock creek drainage for recreation, if they did, they would understand the inequity of the trade. Beautiful habitat vs rock and ice. Thank you for considering how the people who use this area feel. Greg
