Title:

Comments: I am begging your agency to please not log in the very few remaining old growth forests left in the world, to retain ecological integrity in these areas. Regardless of the size of trees being logged, disrupting the soil and creating habitat disruption will severely impact the current residents of this forest.

Using categorical exclusion to bypass environmental regulation is unacceptable for this area. I demand that your agency drop this sale, or at the very least, follow the law and use an Environmental Impact Statement to fully analyze the potential impacts and allow for informed public comments and objections.

Thank you for your consideration of my comment.
