Title:

Comments: Hello!

As a young person who cherishes our wild lands and forests, I hope you will please do the following:

Drop this sale, or use an Environmental Impact Statement to fully analyze the potential impacts and allow for informed public comments and objections

Drop planned heavy logging and virtual clearcutting for this and upcoming timber sales

Don't log in old growth forests. (Although the agency would retain trees equal to or greater than 21", such heavy logging would destroy structural complexity and greater canopy closure needed by old growth associated species such as Pileated woodpecker, marten, and Northern goshawk.

Take good care,

Rebecca Canright
