Subject: Crazy mountain land swap.

My name is Riley Masters and I am an avid sportsman. In some cases land exchanges are a very useful tool to provide better public access, but in this case, it isn't. The public would lose access to a great section of land that holds deer and elk. Only to gain access to alpine covered in rocks. This is not a good deal for the majority of Montana and only benefits the owner of the ranch. I say NO to this swap.
