Title:

Comments: I oppose the exchange of Sections 4 and 8 due to their high value land use high economic value, and easy accessibility for the Public of our public lands.

The quality of hunting, fishing, hiking, bird watching, camping, etc. accessible in these sections are of much higher value than the sections for which this exchange is proposing. The loss of public access to the biodiversity and multiple use available in Sections 4 and 8 would be unfair to the Public who own this land which the USFS manages for "the Greatest Good" .
