Title:

Comments: I oppose the South Crazy Mountain Land Exchange #56687. It is not a fair market exchange for the people of the United States in that these 2 sections provide access, multiple use opportunities, biodiversity and economic value that far exceed the proposed sections of land the U. S. Forest Service would be trading for. I am a life long hiker, bird-watcher, camper and skier on public lands and want to see that these 2 sections remain available for current and future generations of Americans.
