Comments: I oppose the portion of land exchange 56687 in the South Crazy Mountain that included section 4 and 8.

I do not support these two Sections being included in the exchange.

Sections 4 and 8 provide a very versified high value component of natural resources. They included quality biodiversity, riparian, vegetation, timber, wildlife, recreation and public access. The exchange does not appear to be equatable as the above mention sections far exceed the value of the 3 sections of goat rocks proposed.

I feel the USFS is obligated to form there decision and proposal based on the premise of the greatest good of the American people. Keeping these prime section in public land is the right choice for the current and future generation of Americans.

I am a life long participant in this great American experience of public land. I also have had a career of working for the USFS taking care of the land and providing for the people. Please keep this land out of the proposed exchange.
