Comments: Hello there, I urge you to reconsider your plans as written regarding sections 4 and 8 with the proposed South Crazy Mountains Land Exchange. Implementation of this would actually made it harder and more time-consuming for the public to access public lands in the southern Crazies. These sections in particular and as they are designated right now already provide great recreational opportunities for the pubic, while also protecting older growth forests, healthy grasslands, annd excellent wildlife habitat. I urge you to delete and cancel your proposed changes regarding changes in access for sections 4 and 8 of this proposed exchange. Thank you for your time and efforts to implement an exchange but I cannot support this when it actually diminishes public access as currently proposed. (Mr.) Hobie Hare
