Title:

Comments: protect the prairie dog on every site owned by American citizens. we are 328 million strong and we want the grazing robber baron cattle owners off our national land. thney are cheap shysters looking to pay nothing and leaving the land destroyed. we need to preserve and protect wildlife and that is the point of all our laws. this plan disrupts saving and protecting wildlife. the usda is a wildlife killing agency, aphis, etc. when you look at the cowspiracy film you will understand what an environmental disaster allowing these livestock robber baron cattle ranchers are doing to this country. stop allowing these profiteers to keep killing wildlife. the cowspiracy film is a part of my public comment.
