Dear USDA Forest Service,

I am writing to you in strong support of maintenance of the Roadless Rule in Alaska, as well as across the United States. As we continue into our future, a future of climate collapse, it is vital that we preserve what we can. The Tongass beauty, ecosystem, and stability has been 1000s of years in the making and I implore you to not let it's destruction occur. I am a life long resident of Washington State and so I know a little of rainforests. Please do not allow the Roadless Rule to face any watering down. It is not in humanity's, nor the salmon, the bear's, the deer's interest to allow the destruction of the Tongas.

Thank you for your time and attention.

ALICE

P.S. I hope you use the paper airplane functionality [drawing of a heart]
