Comments: Tongass National Forest roadless rule

Dear National Forestry Service Rep,

I am shocked that the Tongass would be opened to logging and road development. This pristine old-growth forest is essential to preserve an intact ecosystem for wildlife and to provide carbon-trapping. Climate change is going to kill us all if we don't take steps to address it. Have you read the recent Army report stating such?

I ask that the Forestry Service take the "No Action Alternative" on the proposed Alaska Roadless Rule to keep Roadless Rule protections intact for the ?Tongass National Forest.

Thank you for doing the right thing.
