Comments: Comment on Rulemaking for Alaska Roadless Areas Draft Environmental Impact Statement

Dear Sirs,

I prefer option 1 (no updates or changes) in regards to the 6 options for updates to access. Preserved areas of forest in our nation are dwindling at too rapid a rate and those we have need to be maintained. The short term benefits from logging and other development in these areas do not offset the public goods lost as these resources are harvested.

Thank you for your consideration,

Kevin Breza
