Comments: I believe strongly that we need to keep sections 4, 8 and 2 in public hands. The public stands to lose far more in recreational value than will ever be gained from the acquisition of any of the other proposed sections. Also, I am not in favor of a reroute of trail 272. We have plenty of trails and trail systems out there. Not improving a trail in this area would allow for a more wild, scenic and remote experience in this area. I have personally stepped foot on almost all of the Forest Service Sections Proposed to be lost with this swap. I have seen the productivity of these three sections previously described in terms of fish, wildlife and even timber. It is second to none and would be a true tragedy for most of the public if they were lost.
