Comments: I do not support the South Crazy Mountains Land Exchange as proposed. The presented options of either approve or disapprove are inadequate to parse out each section that is up for public/private exchange. I would like to see each set of sections from each landowner broken into individual options.

Specifically I do not support the exchange of Public sections 4 and 8 for the private sections 11, 13, and 21.

Sections 4 and 8 offer unique low country public land in the Crazy Mountains that is currently legally accessible to the public. I do not think that trading these sections for high elevation rock will increase public land experience, wildlife habitat, biodiversity, or further uphold the USFS Mission.

We also need to retain our current access points and trails in the Crazies and not allow large private ranches to control the public good. We should not compromise with land swaps that do not benefit the public at least as much as the private land owners.

Please do not approve the South Crazy Land Exchange as proposed.
