First name: Max

Last name: Foster

Organization:

Title:

Comments: As an American that enjoys wilderness public lands on a regular basis, I cannot support the dismantling of protections for the Tongass National Forest. We have very few old growth, pristine, natural places left. We need to protect, at all costs, the natural splendor of the Tongass and all the species that reside in it. I support Alternative 1 (no change, keep current protections in place). Please consider this when making your decision. We cannot undo changes we make to this special place.
