Comments: My wife and I have a seasonal cabin bordering the National Forest and use it for hiking and kayaking frequently when we are in KY. On our last two kayak trips putting in at Poppin' Rock and at Blackwater, we saw Bald Eagles each time. The beauty upstream is unmatched and unspoiled marred only by pockets of trash that we try to bring out each time we get out on the water. I see there several project areas extending down to the waterline near Twenty Six and elsewhere which would be an intrusion on the scenic natural beauty of the upper Licking River. Please hold project areas behind existing woodland buffer if possible so they are not so much noticeable from the water. Thank You!
