Comments: Comments to oppose modification to the Roadless Rule

Dear U.S. Forest Service,

The Roadless Rule helps protect old-growth habitat for birds like the Prince of Wales Spruce Grouse and Northern Goshawk, as well as for mammals like wolves and deer. Opening roadless areas to more logging and roads will fragment the forest and eliminate more of the big old trees that these animals rely on. Furthermore, intact, ancient forests are strongholds of climate resilience, and the Tongass is one of world's largest.

Yet, all of the action alternatives in the Draft Environmental Impact Statement allow more roadbuilding and logging across the Tongass National Forest. Logging roads and timber operations cost tens of millions. Also, forests should be cleared instead for fire prevention. Destructive activities degrade the naturally sustainable wealth of salmon, wildlife watching, and tourism opportunities.

It's time to seriously protect our beautiful wildlife and all the wild areas on the Tongass. I urge you to select the "No Action" Alternative (Alternative 1) and allow the Roadless Rule to remain intact on the Tongass National Forest.

Sincerely,

Anna Munoz

Hercules, CA 94547
