Comments: Comments to oppose modification to the Roadless Rule

Dear U.S. Forest Service,

The Roadless Rule helps protect humans from self-destruction by keeping intact old-growth habitat.

Trees are the resource needed to sustain climate health for future humans. Maintaining old growth forests also supports all wildlife that is already on the verge of extinction due to the climate changes of Now.

It is time to stop opening more and more acres to the timber industry and instead bolster protections to the old-growth forests and wild areas on the Tongass. I urge you to select the "No Action" Alternative (Alternative 1) and allow the Roadless Rule to remain intact on the Tongass National Forest.

Your grandchildren and great -grandchildren will thank you for your right actions of keeping forests intact for their possible future on this planet ??

Sincerely,

Grace Tuma
