Comments: Cascade fee proposal suggestions

Suggestions to streamline/improve Cascade fee proposal:

1. How about setting up some kind of personal account system instead of a daily nickel & amp; dime approach with constant reams of paperwork? e.g.....

& amp;gt;& amp;gt; bill just once at the end of the year, or

& amp;gt;& amp;gt; bill by credit card auto-pay, like recurring utility bills

& amp;gt;& amp;gt; or some other user-friendly accounting process that would minimize user impact.

2. Just because you can charge & amp; limit trail use doesn't mean that you have to! How about a gradual/partial implementation that would begin by only targeting really serious problem areas like Green Lakes or Canyon Creek Meadows? Hold off on some other areas and continue to monitor & amp; evaluate user impact without starting off by tightly regulating everything. Using a smaller scale and more modest start-up approach might also make it easier to evaluate and tweak the process.....and make the impact on the user-public a little less extreme.
