Comments: Fee recommendation

My recommendation is to take this permit system and shove it up your asses. I get that there are a lot of people enjoying these areas but we shouldn't stop people from enjoying these great areas. You guys are going to prevent people from going in nature so they can continue to be lazy fast asses in town, littering and polluting more. I don't believe for an second that a bunch of damn bureaucrats aren't sitting there profiting on this. You pathetic politicians clearly didn't actually research the situation thoroughly. Get your sorry asses out of your offices and out in the real world for a change. Stop preventing people from enjoying these places that you're too lazy to see for yourselves.
