Title:

Comments: Wilderness area fees.

We all know the fees collected (plus fees for processing) will not be used in any way to help the land it is designated for. Just like the Northwest forest pass the fees will simply go toward more useless signs and kiosks at trailheads and law enforcement to ticket people who do not pay for the law enforcement to write tickets. Volunteers have been doing the job the forest service was suppose to be doing the last time you imposed fees for the American people to access "PUBLIC LANDS" and the forest service has done nothing but add more signs and kiosks at trailheads and promote the wilderness essentially creating this problem we now have to deal with, while refusing to write tickets for overuse illegal parking.

Any monies collected from this fee will simply be squandered in useless educational programs, continual sign replacement and any other program you can come up with that does not require people to actually do any work in the actual forest beyond a hundred yards from a car.

NO MORE USELESS FEES!
