Comments: New fees

I as a working father cannot agree to these new proposed fees, you are going to remove the joy of our beautiful land scape from the hands of my self my wife and my daughter who I purposely am raising here in beautiful Oregon cause of the natural beauty but this plan will hurt all working families who want to enjoy and appreciate our open lands and forests. Making it only viable for upper class families. Do not gentrify our forests we need more people to love and appreciate them! Doing this will only hurt our forests not help them. Please reconsider these fees and make them more realistic for working families...
