Dear Willamette National Forest,

The Forest Service should implement other, less restrictive management tools prior to implementing limited-entry day-use permits. Examples include educational programs focused on leave no trace practices, administrative signage, re-vegetation and restoration projects to address areas of concern, and installation of toilet facilities and/or wag bag stations to address human waste issues.

A portion of permits should be held for walk-up, first come first serve availability to allow climbers to attempt summits during good weather windows, which decreases potential weather-related accidents and the chances of getting lost, both of which result in increased search and rescue missions within Wilderness areas.

Sincerely,

kent benesch
