Title:

Comments: I support the issuance of the Special Use Permit to the Arizona Church of Christ Bible Camp because it educates the public, especially young people, on the value of our national forest and the ecosystems that are cultivated and maintained therein. I believe that when the public is better educated, they have a true appreciation for the beauty of wildlife and the natural forest. The impact of the camp and established facilities, along with the limited use by the public, would not, in my view, impact the local or regional environment in any negative way.

I strongly support the USFS issuing the Special Use Permit for the bible camp.
