Title:

Comments: please do not open up these new leases in Sam Houston National Forest, Davy Crockett National Forest, Angelina National Forest, Sabine National Forest, Caddo National Grasslands and LBJ National Grasslands.

We need to protect our national parks and forests and maintain them as valuable habitats for native plants and animals.

humans are destroying our national treasures. these treasures are beautiful just as they are.

please leave them alone!

also, the volume of water needed for this drilling is obscene and threatens the drinking water of thousands upon thousands of texas residents.

our tax dollars should go towards the protection of our waters and lands.

please do not pursue these leases.
