Title:

Comments: The United States of America created the idea of the National Parks system and we've led the rest of the world with this most brilliant example of how to protect and preserve our greatest assets, our beautiful land. People travel from all over the world to visit our lands, there is no greater treasure than American lands. We must not open our treasure to be looted irreparably for temporary, short term gain. The minimal monetary profit does not come close to the great benefit of keeping the lands in tact. Every family deserves to make the same cherished memories as generations before. As a Daughter of the great Republic of Texas and a proud patriot for the United States of America, I must be loud in my resolve to proclaim that these lands be protected for myself, my children, and hopefully any grandchildren I may have. It is the moral thing to do, the Christian thing to do, for this is God's country and we must not forsake it. Happiest of holidays to all, I pray you do the right thing and deny access to these leases.
