First name: Mike

Last name: Lonzetta

Organization:

Title:

Comments: This is absurd. If there's any part of you that cares more about people than profits or cares more about this planet's future more than profits please put an end to this. We just saw an example how well this administration's federal "regulations" work with the explosion in Neches. The local community & wildlife do not need to be subdued to potential hazards & pollutions of some of their main water sources. In the Bible it says the love of money is the root of all evil. This choice of money over the wellbeing of life is an example of that evil. End the evil. Make the right choice.
