Title:

Comments: Please protect our forests and lakes from drilling.

Regardless of whether you believe the drilling itself is harmful -- it very much is -- the pollution that is created around these sites would further decrease Houston's already-terrible air quality, damage and kill species that create important ecosystems that help sustain life on this planet, and would limit recreational use of these lands.

We should be cutting greenhouse emissions dramatically. Not adding to them. History will not look kindly on those who chose to further the aims of the oil and gas industry over the health of the planet.
