Comments: As a an avid naturalist and frequent visitor to our shared forest departments lands I oppose the leasing of the forests department land for well use as it diminishes the amount of land once can enjoy and visit, wastes large amounts of water and ultimately exacerbates AGW as these fuels would increase the concentration of CO2 in the air. The caddo and LBJ lands are escapes from the cocophonous urban environments of North Texas and the Eastern forests are some of the most beautiful sites I have visited in Texas. To lose access to these areas would be of great detriment to the populations well being as I often take trips to these lands with fellow veterans who are struggling with depression and PTSD.
