Comments: I am against the leasing of our National Forests. They are areas of great beauty that offer camping, hunting, fishing, hiking, canoeing and other recreational opportunities for area residents and visitors.

These are multiple-use lands and because they're a public resource, there needs to be GOOD stewardship of those resources. Oil and gas companies across the board have proven time and time again of their untrustworthiness with regard to accessing our natural resources. Leasing out our natural resources should not be allowed.
