Comments: No oil in any public lands should be available for drilling by any private sector member. We don't need more oil, we don't need more plastic, we don't need to destroy any more habitat or propel any more noxious chemicals into the air. There are plenty of jobs currently if this administration is to be believed and we certainly don't need any more millionaires trying to influence votes in Congress. This opening of park land to drilling companies is a very bad plan with few if any positive outcomes.
