Title:

Comments: Absolutely do not allow this to take place. The current administration has no interest in protecting the sanctity of our country, our precious and rapidly disappearing natural lands, or any of it's citizens. The current administration's focus is solely that of garnering votes in the upcoming elections. Should this be allowed, very strict and unbending conditions must be set, eg., if at any time any polluting of water supplies, petroleum/natural gas leakage, land subsidence, increase in earth movements, etc. occur, drilling leases are immediately revoked. How much destruction to our environment must take place before this administration accepts the fact that global warming is a real and irreversible condition???
