Title:

Comments: This is a National Forest, owned by We the People of the United States of America, I for one do not give anyone permission to log our National Forest. This excuse of Forest Health is just that an excuse for greed. Logging the forest is not healthy for the forest, us or it's inhabitants. It is the destruction of the forest, probably getting it ready for development. Deforestation is killing us and our planet. Stop!!! Nature knows how to care for itself, it doesn't need man's help. All man knows how to do is destroy.
