First name: Autumn

Last name: Costelle

Organization:

Title:

Comments: As a lover of Kentucky forests and wildlife, I am very concerned by the current plans for logging in the South Red Bird section of Daniel Boone National Forest. I urge and plead that alternative, less invasive and less damaging options be pursued. This is no time to be anthropocentric in our actions. I know I and many others would respect an organization that sees the larger picture, listens to people's concern, and does the right thing for forests.
