Comments: I am writing to suggest a halt to any and all commercial logging prescriptions in the South Redbird area of Daniel Boone National Forest. I understand that National Forest land is chartered to serve a number of constituencies. However, logging companies have shown they cannot be good stewards of these kinds of projects.

There is plenty of evidence on Lower Jack's Branch of the serious and long lasting effects to the land that logging will have, and I hope the Forest Service will learn from this mistake and exercise caution in this case.
