Comments: Re:

Tongass National Forest Roadless Rule Revoking

I email to urge the Forest Service to adopt Alternative 1, the No Action Alternative.

The Tongass is an immense carbon-trapping (greenhouse gas gtrapping) forest. It is needed right now. Climate change is real.

It also protects salmon in its environs.

Bringing industry into the Tongass National Forest further degrades the environment.

It should NOT be done at the whim of President Trump, decidedly a city and money man, or the Governor of Alaska and supporters in the state.

I have lived in Fairbanks and I do not believe that grumblings about what "The Lower 48" wants are rational enough to decide to open the Tongass NF.

Thank you for your interest.
