First name: Stephen

Last name: Hynden

Organization:

Title:

Comments: The federal forest land should not be controlled by politicians and business interests, but by the citizens of this federation of united states.

To that end, I beseech your organization to oppose all efforts to reverse the benefits of the 2001 Roadless area conservation Rule in order to prevent any more loss of the nearly 60 million acres in the Tongass National Forest of SE Alaska.

This current president of the USA and administration continues to desecrate the wilderness and such disregard for the will of citizens, indigenous peoples, and the future of our country, climate and children must be halted by agencies as yours.

Regards,

SH
