Comments: To Whom it May Concern:

I support timber management for value, wildlife, forest health, and recreation. With respect to the latter, I request that you consult with the Methow Trails Collaborative and Evergreen Mountain Bike Alliance with respect to any proposed action in or near the Sun Mountain trail network. There are a variety of new trails in the system the will need to be restored should they be damaged by the restoration work. Additionally, there may be opportunities to coordinate on development, expansion, maintenance of the multi-use trail system.
