Title:

Comments: I support the objectives of the Twisp River Restoration Project, but wanted to voice my concern that recreational opportunities including mountain biking, trail running and cross country skiing in the area be maintained to their current standards and interruptions be minimized or better yet non-existent.

Please avoid damaging current trails in the area. If trails are damaged, please make sure that the trail reparations are made by the user group (Evergreen Mtn. Bike, Methow Trails, etc.) at the expense of logging companies or USFS, not non-profit user groups.

Please make sure at least 30 days notice is given in advance of logging operations.

Please make sure logging trucks enter from the Twisp River side of Thompson Pass to minimize conflicts at the Chickadee Trailhead.

Additionally, it would be if the following were approved as part of the NEPA process: Extension of "Climb It Change" to intersect Pete's Dragon at the top and avoid two-way traffic on the top section of Pete's. Construction of warm-up mtn bike and cross-country ski trails at the Chickadee Trailhead to minimize use of the parking lot and surrounding roads for this activity.

Thank you.
