Comments: UTV width

I live within 5 miles of the door run trail system. I cannot ride your trails because of the 50&quot; width restriction.

The side by side market has overtaken the ATV market 4 to 1. I understand that this would entail a significant amount of work, however the trail system needs to grow with the market.

My recommendation is that the trails be made to accommodate 64&quot;. This would cover 90% of the side by side market.

Another suggestion would be to make your trail system directional. So many times if riding door run in the past, I ran into other riders in blind curves and hills.

Not sure if either of these is feasible.

Thank you for your time and consideration.

Justin
