Comments: logging the Tsongas forest

I am an U.S. citizen living in the state of Maine. I am writing to you to state my objection to logging over that forest. It is not only a national treasure but a global one, just like the Brazilian rain forest. We need to promote tree growth not cut it in this time of climate crisis.

As a nation and as private citizens one of the best things we can do to hold off climate calamity is to plant as many trees as possible.

Betsey Clark

Lebanon, Maine
