Comments: Maximum protection to Tongass National Forest

Dear Forest Service:

Please do not permit road building and commercial development in the Tongass National Forest, the world's largest intact temperate rainforest. The Tongass National Forest absorbs more carbon than any other forest in the U.S. It should remain unspoiled and intact because it is a major neutralizer of carbon emissions which drive climate change.

If you must harvest some of the Tongass Forest's trees for timber, then please choose alternative 2, which will cause the least amount of destruction to this irreplaceable forest. Alternative 6 will cause too much destruction to this ancient rainforest which is home to endangered species and to a variety of other important species of flora and fauna.

Our forests must be preserved and protected as much as possible for the health of our planet and all of its inhabitants. Thank you!

Sincerely,

Susan Fong and Family

Las Vegas, NV 89102-6118
