Comments: Protect the Tongass National Forest

I urge you to select Alternative 1, the "No Action" alternative on the Alaska-specific Roadless Rule.

Logging the Tongass will fragment the forest and harm wildlife that rely on old-growth habitat. Further, the ancient trees serve a vital carbon sink and act as a counterweight against the climate crisis.

Please protect the Tongass from logging and choose the "no-action" alternative.

Regards,

Maia Van Pelt
