Comments: Save the forest!

We need to save the Tongass National Forest so that it can save us all!

Do not let us go farther away from Mother Nature. We are connected to these trees and animals. Let's not snuff out our resources. We can only go so far till you run out!

There are countless better alternatives out there. Money is nothing without life. Profit can still exist in less destructive ways!!! Tourism brings in more profit than logging!

Do not touch it!
