Comments: preserve the Tongass

I am writing to comment on the Tongass exemption from the AK Roadless rule. I strongly believe in Alternative 1 - no exemption. The Tongass is a beautiful and irreplaceable forest and it should not be logged. It is an integral part of the whole ecosystem in that area - the water quality affects spawning salmon and orcas, and the forest supports both wildlife and plant life that we we need to preserve, not destroy. I used to live in Alaska and I have visited the panhandle several times. Please preserve the Tongass.
