Comments: To gas's logging

In response to President Trump's desire to open logging, I say no! We need to leave old growth alone. Logging is a violation by humans of land protected by our laws. There is enough going on in the lower 48 that is easier to manage. Alaska is a very harsh environment of which only a few months would be conducive to working in. Then you have the cost of transportation. I just can't see any positive benefits to this raping of the land. I'm a avid Trump supporter but not in this effort.
