Comments: Keep the Tongass roadless for wildlife

I strongly urge the Forest Service to select Alternative 1, the [ldquo]no-action[rdquo] alternative instead of allowing roads and other damaging construction in this area so important to wildlife. This is short-sighted and destructive. Once forests are logged, the habitat is forever altered.

There is little to no justification or documented support for removing protections. Once again, capital and capitol interests are trying to serve a tiny segment of the human population and destroying habitat through fragmentation and pollution of all kinds.

I urge US Forest Service to listen to the public and respect the rights of all species who live in the Tongrass.

Thank you,

Jean Maust
