Comments: roadless discussion

To whom it may concern:

I am writing in response to solicitation for public comment about the proposals to alter the current roadless status of much of the Tsongass national forest. Though I live in Minnesota I strongly support ongoing protection of National forest lands with roadless protection. These lands are important for preservation of critical watersheds as well as many threatened flora and fauna. Can we not leave some small parts of our Earth alone?? Thank you

David Reitz MD
